

# **Specials Made Easy**

*Coalesse Customization Services*

---

This specials guidelines brochure describes our customization services and provides a simple product matrix to help you understand the different ways we can modify our products.

For further assistance, please contact your Coalesse sales consultant or our specials team at 1.800.627.6770.

For 24/7 convenience, Coalesse now offers an online eSpecials Library for quick searches for product availability, immediate pricing and for ideas. Visit [especials.coalesse.com](http://especials.coalesse.com).

We look forward to working with you!

## **Great spaces inspire great work.**

That's why we welcome each opportunity to help you create your next great space.

If our standard products cannot fulfill your specific needs, our specials team will work closely with you to create a more personalized, tailor-made solution.

### **SERVICES**

- Experienced local sales consultants to discuss customization options
- Knowledgeable specials quote team for feasibility guidance and pricing
- Creative application specialists for space planning and concept drawing assistance
- Dedicated specials engineers for technical consulting

E-Table (standing height)

Host Table (custom size and cutouts)

## **Specials and Custom Classifications**

The majority of requests to modify Coalesse products fall under our specials classification. This classification combines our ability to maintain the products' original design, functionality, and engineering integrity with the ability to source special materials and manufacture the modified product.

A small percentage of requests are not derivatives of our standard products but are more complex projects that require custom products or complete work settings. These custom projects require more time to collaborate, design, engineer and may take considerable quotation time due to its complexity.

A specials quotation may take one to three days depending on the complexity. Changes requested after submission may add additional days for quotation.

Our Coalesse specials team will advise you where your request falls under (specials or custom classification) and will guide you to the appropriate Coalesse expert.

## Specials Requirements

Our goal is to offer thoughtfully-crafted solutions for every product modification to sustain our commitment to quality and safety. We say “yes” to over 95% of specials requests received and occasionally decline requests that do not meet our minimum requirements.

### MINIMUM REQUIREMENTS

- Meet BIFMA industry standards (Safety/Coalesse)
- Meet original product test standards
- Meet same Coalesse warranty and quality standards as original product
- Meet appropriate agency and/or municipality regulations (Chicago, NYC, LA, etc... )
- Obtain UL/CSA approval (if required on baseline product)
- Comply with patents (no infringement on Coalesse/Steelcase design or utility patents)
- Must not infringe on non-Coalesse/Steelcase patents (design or utility)
- Must not be a culled or announced culled product
- Must have standard style numbers assigned for newly-introduced product before quoted

## Surface Materials

We have established a variety of surface material programs that are designed to help manage information for special requests. The categories shown provide surface material guidance. If not listed, please call us at 1.800.627.6770.

### **PAINT**

All special paint requests need to be handled through our Specials quote team. Minimum quantity requirements may be applicable depending on product specified.

### **NEW: COALESSE COLOR**

Choose any standard paint color or any color to match on select Coalesse product lines. The special program features infinite color options in matte or gloss finishes, 24-hour quotes and 15-20 additional days for production.

- **Preset + Customizer Specials** products are priced based on standard tiered quantity upcharges with a minimum of 10 units. Immediate pricing is available.
- **Rapid Specials** products are quoted per project. For current products and full program details, see [coalesse.com/resources/coalesse-color](https://coalesse.com/resources/coalesse-color).

### **LAMINATES**

Requests for non-standard Laminates must be made through our Specials quote team.

### **HARD PLASTICS**

Plastic parts can be quoted but require extended lead times and added investment to cover the costs of engineering, tooling, testing and sampling. Minimum quantity requirements may be applicable depending on product specified.

### **SOFT PLASTICS (TABLE EDGES)**

Edge bands can be quoted but require extended lead times and added investment to cover the costs of engineering, tooling, testing and sampling. Minimum quantity requirements may be applicable depending on product specified.

### **METAL PLATING**

Zinc, chrome or nickel plating are not available due to substrate preparation costs and environmental impact.

### **WOOD**

For custom stains, please utilize our Coalesse Customiz stain process.

We will quote a wood edge in combination with a laminate top. Please refer to our Coalesse spec guide for specific product top options.

We will quote custom species veneer, but the base product must have wood as a standard option due to manufacturing process requirement.

### **GLASS**

All furniture-related glass is required to be tempered for safety. Coalesse offers a variety of glass options as standard.

If non-Coalesse supplied glass is used, the Coalesse warranty will not be valid due to variable glass weights and Coalesse test requirements.

### **TEXTILES AND LEATHERS**

Special requests for using non-standard textiles and leathers must go through our Coalesse COM testing process. Contrasting textiles can be managed as a standard option on our products except if special treatment or CAL133 specified. These need to go through our special quote team.

Large projects desiring a fire code option on a non-FSC approved product may be considered for quoting through our special quote team. Submit only product lines with \$250,000 net or greater of a specific CAL133 model for review. Product will be evaluated for feasibility and approval before proceeding.

### **OTHER**

Due to environmental issues, testing concerns, quality control, and cost of complexity, we reserve the right not to quote any coating or surface material or surface condition.

Galvanized finishes are not available due to quality control of the finish and environmental/safety of the operator impact.

Raw steel or primed-only steel panel frames or other steel parts are not available since we cannot control the final product quality.

### **NOTE**

We have reviewed a variety of conditions under which Specials are not feasible, yet we still encourage any questions or inquiries if you have an idea or unique opportunity. Our goal is to adapt our product offering to your needs, providing safe, high quality solutions.

**MATRIX BY PRODUCT**

The following provides a reference guide to special options on every Coalesse product. By quickly looking at the legend symbols shown, you can view what is and is not available as a special or option. Frequently requested specials are available in the Design Options spec guide online.
