# ART OF THE SIMPLE FOLD

---

**Akira**

## ART OF THE SIMPLE FOLD.

Akira is the high-performance multi-purpose table for active spaces. With its one-handed folding lever, it easily folds and nests. One person can set it up, take it down, move it and completely store Akira with minimal effort. A swivel mechanism allows the table to rotate on its axis and infinitely nest in a straight line; the legs pirouette to their nesting position automatically.

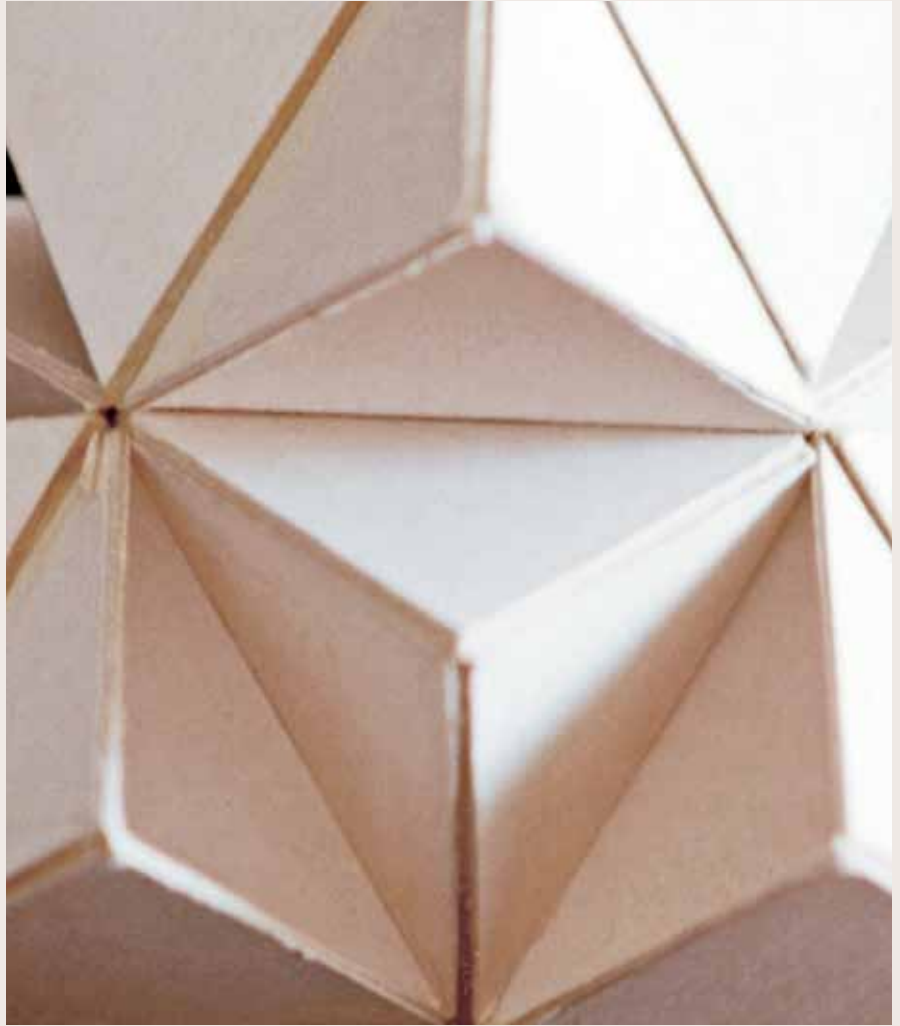

With its clean design aesthetic and broad offering, Akira will enhance the look and functionality of any training, conference or training room.

*"We think in generalities, but we live in detail."*  
\_Alfred North Whitehead

Akira is the ultimate table solution for rapid reconfigurability and ease of use.

## MULTI- PURPOSE

---

Multi-purpose rooms are becoming more popular as businesses try to do more with less space. Akira flip tops are the new paradigm. Because the tables are on casters, and never need to be picked up, one person can quickly and easily set up a room without difficulty. Tables can be ganged to accommodate most spatial needs.

*I do not believe you can do today's job with yesterday's methods and be in business tomorrow.*  
\_Nelson Jackson

Simple technology accommodation with clever and intuitive wire management.

## HIGHER LEARNING

---

For spaces that don't require nesting, a fixed base (non-flip) version is available. Akira is available on casters and glides, and offer accessibility-compliant and height adjustment options as well. To accommodate technology, miniport pop-up modules with power and data outlets are available

at the table top. The optional neoprene modesty panel controls, manages and conceals wires and cables.

# DETAILS

The Akira table collection comes in a variety of sizes and shapes of table tops: rectangle, trapezoid and d-shape. They come in two leg options - L Base or T Base providing maximum clearance and leg room. An optional height adjustment feature meets ADA standards and requires

no tools for adjusting. Akira has an optional modesty panel of black neoprene. Other options include vertical and horizontal wire management, flex or bar gangling devices, power and data access and grommets.

## Surface Materials

**TABLE TOP:**  
ANY STANDARD GRADE OR GRADED IN LAMINATE OR VENEER (FIXED TABLES ONLY).
