CLEVER
DESIGN

Capa

Design is not just what it looks like and feels like. Design is how it works.

_Steve Jobs

The refined detailing on the Capa seating collection separates it from the average stacking chair. It is sophisticated, elegant and practical.

GRACEFUL
AESTHETIC

With its unique shape and double-needle topstitching, Capa adds contemporary elegance with practical comfort to almost any décor. Capa's clever design is often referred to as the armless armchair.

The recessed side panels are a comfortable resting place for arms while the unique shape of the chair allows for unrestricted postures.

DETAILS

Capa has a larger presence than most side chairs, creating impact with the openness of the seat, and its fully-upholstered seat and back.

Capa is a lightweight chair at only 18 pounds. The slim metal legs add contrast to the overall appearance while boasting strength and durability.

Product Features

A RECESSED ARM PANEL
B TOP STITCH DETAIL
