ARCHITECTURAL CLARITY

Together

Coming together is a beginning; keeping together is progress; working together is success.
_Henry Ford

In pursuit of new solutions for collaborating together at a table, the design team at EOOS has redefined the corner bench.

CORNER SEAT REDEFINED

The new interpretation of the corner seat is a sculpture of architectural clarity with the seating comfort of good upholstered furniture. An impressive appearance perfectly defines the meeting place – both at home and at work.

When used in a conference or dining setting, Together creates a very intimate user experience and invites additional occupants to the setting.

With its straight lines and suspended architecture,
Together makes itself at home in every setting.

AN INVITING DESTINATION

Whether in private offices or social settings, Together offers an inviting destination for collaboration and team building. In public spaces, Together creates elegant and inviting settings spaces for businesses with

discerning taste. At home, the bench is comfortable, yet a contemporary piece of art that brings family and friends together.

DETAILS

Together is a sleek masterpiece that is available in leather, fabric and COL and COM. The corner shape allows the ability to create space definition and partition a “room within a room” while the straight bench allows for open seating.

With different widths and lengths of the backrest, it corresponds to the space available. The base is perfectly equipped for comfortable seating and the backrest doubles as an armrest.

Product Features

- A LEG AND SEAT DETAIL
