Sistema Lounge System by Coalesse may contribute to the following building standards and initiatives (5) in the following ways, depending on options.

Potential contribution area	LEED® Credit	The WELL Building Standard® Feature	
Recycled content: Pre-Consumer: 4% Post-Consumer: 5%	BPDO - Sourcing of raw materials, Furniture and medical furnishings		
SCS Indoor Advantage™ Gold	Low-emitting materials	Feature 04	
BIFMA LEVEL Targeted	BPDO - Material ingredients, Certified Feature 97 multi-attribute Products and Materials		
Materials Transparency	Sistema Lounge System by Coalesse may meet the Furniture and Medical Furnishings credit of LEED.	Sistema Lounge System by Coalesse may meet the Toxic Material Reduction Optimization feature of the WELL Building Standard.	
Light reflectance Values: Surface Material Specific	Sistema Lounge System by Coalesse may meet the Interior Lighting credit of LEED.	Sistema Lounge System by Coalesse may meet Feature 59 of the WELL Building Standard.	

Others	
Healthier Hospitals	Sistema Lounge System by Coalesse may meet the Healthier Interiors goal of the Safer Chemical Challenge, depending on options. Please visit Healthier Hospitals for a complete list of Steelcase products that may contribute to the Safer Chemicals Challenge.

Pre-consumer materials (or post-industrial recycled materials) are materials diverted from the waste stream during a manufacturing process. Excluded is reutilization of materials such as rework, regrind or scrap generated in a process and capable of being reclaimed within the same process that generated it.

Post-consumer materials are materials generated by households or by commercial, industrial and institutional facilities in their role as end-users of the final product, which can no longer be used for its intended purpose. This includes returns of material from the distribution chain.

Indoor Advantage™ and Indoor Advantage™ Gold are trademarks of Scientific Certification Systems.

LEED® —an acronym for Leadership in Energy and Environmental Design™—is a registered trademark of U.S. Green Building Council®. These are the probable contributions; exact contributions will be dependent on the LEED rating system and the specific product. Refer to www.usgbc.org for LEED Program details.

The WELL Building Standard® is the first standard to integrate human health and wellness into the design, construction, maintenance and operations of buildings. Learn more at WELL certified.com.

Steelcase sustainability related actions and results are communicated annually in the Corporate Sustainability Report.

⁽¹⁾ Calculations of recycled materials exclude packaging and are based on data provided by professional organizations, suppliers and other available information. Recycled materials are determined by weight and defined in accordance with ISO 14021. This data may include industry averages, ranges or other broadly-based information. Steelcase makes conservative assumptions when compiling this information to provide the most accurate recycled content calculations possible but variability in market conditions or manufacturing processes may result in higher or lower content. This document will be reviewed and updated periodically and is subject to change without notice. Recycled content may include pre- and post-consumer materials:

^[2] In locations where recycling is available. To be compliant with applicable regulations, Steelcase calculations are based on the materials having physical properties that allow recycling, our evaluation of the ability to disassemble the products and the actual availability of recycling services in the markets where the products are sold. Steelcase offers services to assist customers with end-of-use options including resale, refurbishment, charitable donation, and recycling.
