Coalesse Material Capabilities

Hardwoods. Stone. Composites.

Solid, Natural Materials

Select hardwoods and stone choices create enduring surfaces that can last and improve with age for generations. Every table is unique and a beautiful expression of natural materials.

Coalesse Material Capabilities

Hardwoods

Select hardwoods

- Solid American White Oak and Black Walnut, flat cut
- 1 ¼" solid top with knife edge profile
- Planked visual, 3.5-5.5" width boards randomly applied

Select tables

- Potrero415 Table, technology cutouts not available
- SW_1 Table, no subtop, resulting in ½" lower overall height than standard
- Available on 1-piece table tops measuring up to 54x108

Unique characteristics and care

- Each solid wood top will be unique and reveals the character and history of the tree.
- Solid wood is a living material. Slight irregularities due to daylight, temperature and humidity changes are to be regarded as normal.
- Follow suggested wood guidelines for optimal environment and storage. Solid wood is subject to warp or split if not followed.
- The above are properties of solid wood, and are not covered under the 5 year warranty.

Stones

Unique characteristics and care

- Stone is a natural material with variations in veins, color and pattern, making each top truly unique
- Spilled liquids must be wiped up immediately. Colors of certain liquids can be absorbed into the stone surface and discolor it.
- To clean, use a slightly damp cloth and dry with a soft towel. Select a cleaner that is made specifically for stone. Most generic, store bought cleaners contain acid which can damage the finish.
- Stone can easily chip or break during handling and installation. Take care to use installers trained to handle these materials.
- Stone tops are heavy and may require up to a six person crew to install, based on size. Always transport stone vertically, never flat.
- The above are properties of stone, and are not covered under the 3 year warranty.
